# School Strategic Plan - 2018-2022

Portland Secondary College (8798)

<p><b>School vision</b></p>	<p>Portland Secondary College's vision is to develop a student- centred learning community that offers exciting and extensive pathways to facilitate 21st Century learning that is broad, flexible and inclusive. The College motto is "Creating Opportunities". (Please note that the vision may be revisited Term 2, 2019 in consultation with the College Community)</p>
<p><b>School values</b></p>	<p>Portland Secondary College's values are Respect, Success, Resilience and Creativity. We treat ourselves and others with consideration, being courteous at all times and acknowledge diversity and the rights of others. We strive to do our best, being dedicated to learning and reaching our goals. We take ownership of our behaviour and actions, persistently contributing in a positive way across all parts of the school. We work together with a focus on positive outcomes, communicating effectively to inspire and support each other.</p>
<p><b>Context challenges</b></p>	<p>Portland Secondary College is yet to embed a whole of school instructional model, build consistent teacher practice and to activate student voice and agency in their learning. At the time of the Review differences between teacher practice across the classes were noted. High achieving students were not being extended and there were a growing number of students making low growth. However the foundations for improvement had already been identified and a concentrated emphasis in the future on the Learning Architecture (Esther Weichert) will enhance Curriculum Planning and Assessment (FISO) and the Advancement Via Individual Determination (AVID) pedagogy should develop higher expectations in, and for, all students. The combination of the two programs, which compliment each other, will Build Practice Excellence, cover the High impact Teaching Strategies, develop Intellectual Engagement and self awareness and empower students to have a voice in their own learning. Teacher time and focus on working collaboratively and continually seeking clarity will develop closer cohesion across the College. The Sub School Structure will support student connectedness and inclusiveness and provide further opportunity to embed the targeted practices.</p>
<p><b>Intent, rationale and focus</b></p>	<p>Portland Secondary College is intent upon improving Literacy and Numeracy outcomes for all students and increasing their voice and agency in their learning while also developing leadership capacity across the College. This is important as it will maximise learning success for students irrespective of the pathway that they chose and will ultimately broaden student choice. Empowering students through voice, agency and leadership will support students to clarify, direct and challenge their own learning. The College had already identified the pathways that will achieve this. Through the Learning Architecture and AVID pedagogical model a whole of school teaching and learning model will be embedded that will lead to differentiated teaching and learning, increase teacher capacity and efficacy and support the student skills needed to develop their student voice and agency, All teaching staff and principal class will attend initial AVID professional development. The rollout process through Professional Learning Communities will assist in building cohesion, clarity and collaboration across the College community. Monitoring through Learning Walks, regular feedback to Curriculum and AVID teams, the Performance and Development Plan and Peer to Peer observations will ensure that</p>

	<p>there is consistency. The roll out of individual pedagogical strategies will be strategically timed to allow staff and students to adopt the practice and embed it. The initial focus will be on Year 7 and Year 9. Leadership capacity of both staff and students will be highlighted and developed throughout. Likewise the Learning Architecture will be rolled out in a timely manner via the Improvement Cycle to allow deep understanding, implementation and consistent uptake. This will begin with Curriculum Mapping at Year 7 and a process for quality control will be embedded into meeting agendas with identified staff responsible for follow-up.</p>
